This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

I would suggest that first of all they start to hire more team members as their company is growing. They should work more alongside the rest of the company's higher ups and talk about the direction of where the company is headed in terms of its growth.

In terms of security, they should 100% implement more rules and regulations to the workers and their access to information. By implementing proper roles and positions, they can easily delegate certain tasks to each employee depending on their clearance in the company. Also, with an organized work tree of employees, this will allow a smoother process when adding recovery techniques to the companies infrastructure after breach of security. Installing an intrusion detection system (IDS) will help making recoveries easier and keeping data more secure. Lastly, I suggest adding backups for all of the data that they are storing so that it ensures customers as well as employees that their information and jobs are secure. These topics of discussion will increase the Confidentiality, Integrity, as well as Availability while strengthening their ability in following rules and standards of the NIST CSF.
